## TEMPORARY

### AMENDED

59732-T

# APPLICATION FOR PERMISSION TO CHANGE POINT OF DIVERSION, MANNER OF USE AND PLACE OF USE OF THE PUBLIC WATERS OF THE STATE OF NEVADA HERETOFORE APPROPRIATED

Date	e of filing in State Engineer's Office	JAN 3 1 1994
Retu	urned to applicant for correction	
Cor	rected application filed	MAR 2 3 1994 MAR 2 3 1994
	The applicant	Company by Charles Zimmerman, agent
	P. O. Box 669	Carlin
		Of City or Town
	State and Zip Code No. point of diversion of a ]	hereby make application for permission to change the
	Point	t of diversion, manner of use, and/or place of use
of v	vater heretofore appropriated under	permit 56837  Identify existing right by Permit, Certificate, Proof or Claim Nos. If Decreed, give title of Decree and
	ify right in Decree.	
	undera	round; well GQDW~12
1.	The source of water is	Name of stream, lake, underground spring or other source.
2.	The amount of water to be changed	5 cfs (2244.15 gpm)  Second feet, acre feet. One second foot equals 448.83 gallons per minute.
3.	The water to be used for mining watering, domestic	, milling, irrigation, infiltration, surface discharge, rigation, power, mining, industrial, etc. If for stock state number and kind of animals.
	_	wining william impleation infiltration curface
đi	scharge, domestic, dewatering	g Irrigation, power, mining, industrial, etc. If for stock state number and kind of animals.  Within the NW quarter of the SW quarter of section
5.	The water is to be diverted at the follow	Within the NW quarter of the SW quarter of section point.  Describe as being within a 40-acre subdivision of public survey and by course and public survey and by course and public survey and by course and public survey and publi
	distance to a section corner. If on unsurveyed land, it sh	at a point from which the NW corner of said section 35 mould be stated.  ance of 2934 feet. (see attached Amended map)
6.	The existing permitted point of diversion	n is located within SW quarter of section 35 of T34N, R51E,  If point of diversion is not changed, do not answer.
	M.D.B.&M., at a point from w	hich the NE corner of section 36 of T34N, R51E, M.D.B.&M.,
٠		766°52'E a distance of 10008 feet.

#### (PERMIT TERMS CONTINUED)

This permit does not extend the permittee the right of ingress and egress of public, private or corporate lands.

The issuance of this permit does not waive the requirements that the permit holder obtain other permits from state, federal, and local agencies and is specifically issued contingent upon approval by the Nevada Division of Environmental Protection of the dewatering project.

This permit is issued subject to the provisions of the State Engineer Order No. 1055 dated April 1, 1992, concerning rules for well spacing and modification of well drilling regulations in Maggie Creek Groundwater Basin.

Any water obtained under Permits 53384, 53385, 54339, 54340, 54341, 55616, 55617, 55618, 55619, and 56831 through 56839, inclusive, as a result of the dewatering program by the permittee and any subsequent changes shall be used first for the beneficial uses of mining, milling, heap leaching, drilling, construction, dust suppression and other related mining and milling uses within the place of use as described, hereinafter referred to as mining and milling purposes.

Water not used for the aforementioned purposes must be used for mitigating any impacts to existing groundwater or surface water right holders. Before any water can be utilized for mitigation purposes, the permittee must apply for and receive from the State Engineer any approval necessary.

The State Engineer may require injection of excess water, or substitution for other permitted groundwater uses as other possible mitigation measures.

Water may be placed in the Maggie Creek Reservoir (approved on July 21, 1992 under Dam Safety Permit J-387) and upon receipt of the necessary permits from the Nevada Division of Environmental Protection, may discharge water to various Humboldt River drainage systems. The use of this water shall be subject to the Humboldt River Decree.

Any approval granted by the State Engineer for irrigation purposes using water under these permits shall be within the irrigation season as specified in the Humboldt River Decree. Any water used on lands not previously under irrigation or having irrigation water rights must be substituted by foregoing irrigation on an equal number of acres and acre-feet under Proof No. 00171 of the Edwards' Decree of the Humboldt River Adjudication. The substitution shall be based on actual water used for the additional acreage and offset by actual allocations from the Humboldt River. Any schedule of irrigation shall be submitted to the Division of Water Resources' Supervising Water Commissioner prior to the actual irrigation of that land. The Supervising Water Commissioner will then set what lands and priorities will not be served under Claim No. 00171 of the Edwards' Decree.

Any other impacts caused on the Humboldt River system by this dewatering must be mitigated in a manner approved by the State Engineer.

A monthly report shall be submitted to the State Engineer within 10 days from the end of each month which shall include the amount of water pumped from each well; the amount used for mining and milling purposes; the amount diverted to the reservoir; the amount discharged to any surface drainage and which drainages; the amount injected back to the groundwater with the location of the well and the depth to where water is injected; and the amount of water used for any other purpose allowed under these permits. All groundwater and surface water monitoring data shall be submitted to the State Engineer on the same basis as specified in Appendix "A" - Mitigation Plan of the Final Environmental Impact Statement, Newmont Gold Company's South Operations Area Project (November 1993).

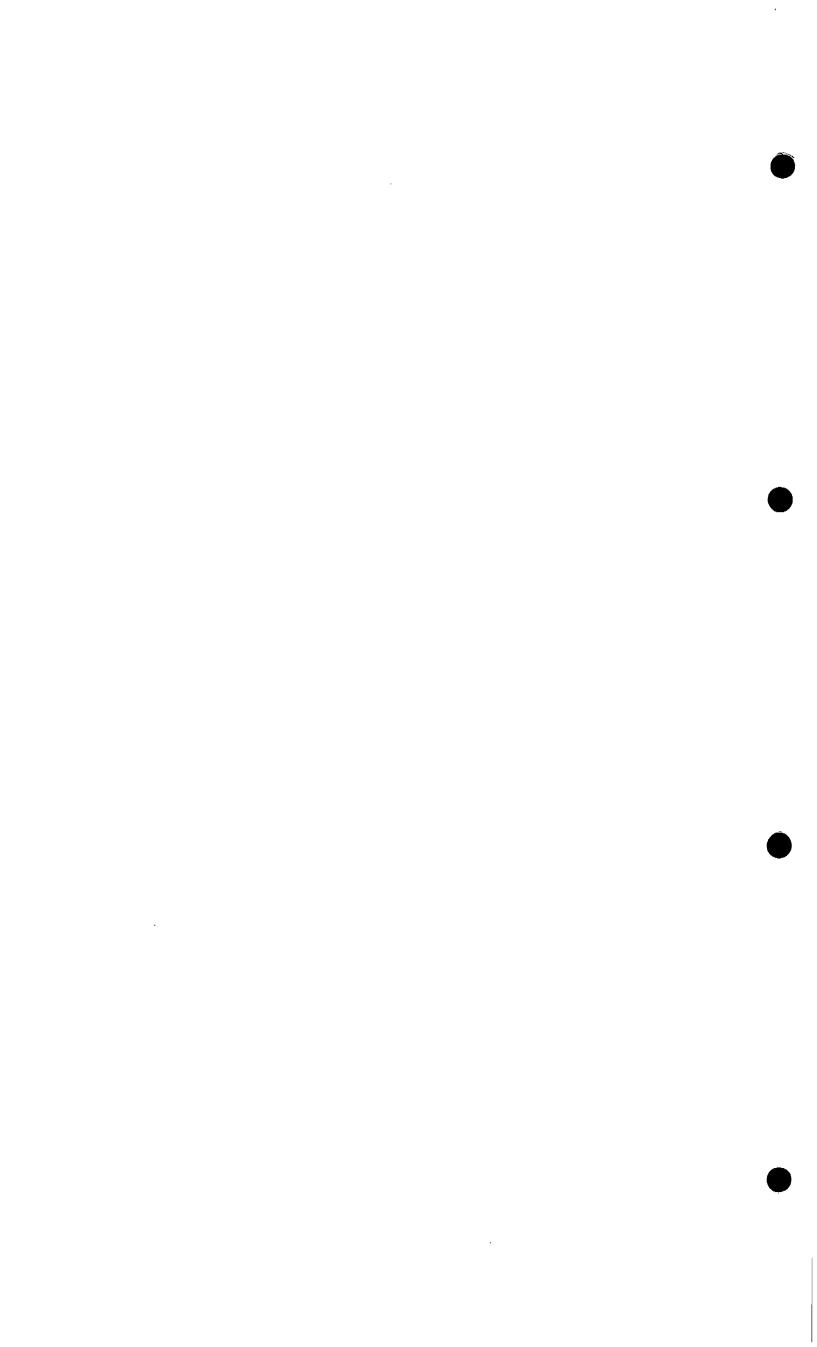

The total combined duty of water under Permits 40900, Certificate 13392, 47962, 48328, 48330, 48910, 48911, 48912, 49550, 49916, 49962, 51962, 52330, 52331, 52332, 52883, Certificate 13398, 52884, 53384, 53385, 54339, 54340, 54341, 54510, 55616, 55617, 55618, 55619, 56831, through 56839, inclusive, 59731-T, 59732-T, 59733-T, 59734-T, 59735-T, 59898-T, 59899-T and 59900-T shall not exceed 10,660.42 acre-feet annually for mining an milling purposes.

The total diversion rate allowed under all permits associated with the dewatering program and all related mining and milling purposes shall not exceed 110 cfs.

A year-end report shall be submitted to the State Engineer no later than 45 days after the end of the calendar year as to how many wells have been drilled under this permit as well as how many wells have been abandoned. The exact location of each well drilled or abandoned shall also be supplied in this report, and illustrated on a supporting map.

Upon permanent cessation of all mining and milling purposes, and dewatering, all water granted under these permits shall revert back to the source from which it was appropriated except for any water requirements needed for any mine closure plan and/or to mitigate any adverse effects caused by dewatering.

i.

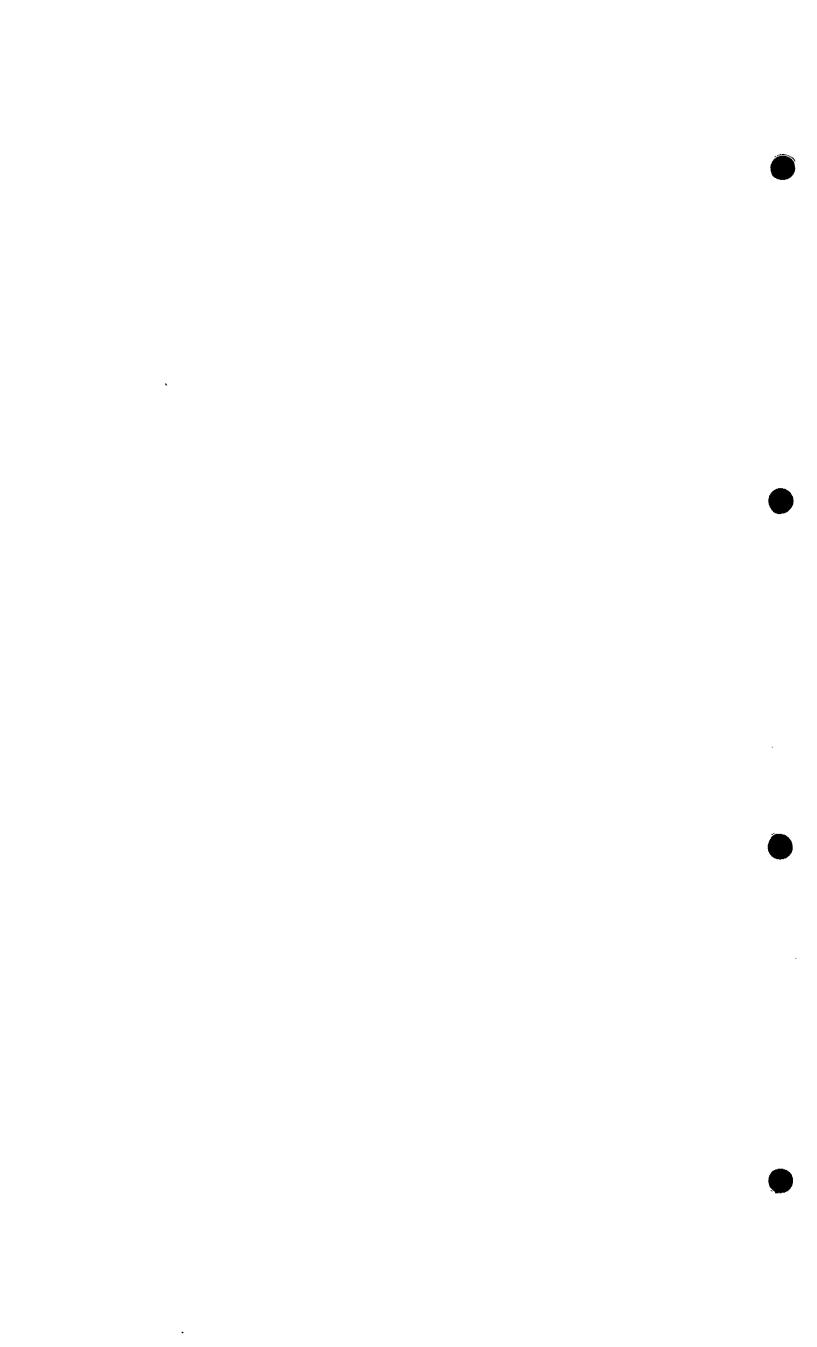

Page 3 59732-T

The State Engineer retains the right to require at anytime the permittee to cooperate in funding of additional monitoring and modeling by an independent third party.

The State Engineer retains the right to impose future conditions as necessary upon review and evaluation of all data submitted reporting on the dewatering program, water use and the monitoring plan.

The permittee, on a quarterly basis shall prepare and present an update on the activities of the mine and dewatering projects, and the Maggie Creek Basin Monitoring Plan, submitted September 10, 1992.

To protect existing rights and public interest, the State Engineer retains the right to regulate any or all pumping under the dewatering project and/or any other groundwater withdrawals herein authorized.
